

We make corporate volunteering in Amsterdam work:

As real 'social matchmakers' we connect companies that want to make an impact with vulnerable Amsterdammers who need a helping hand. At all the events we organize, the interaction between volunteers and help-seekers is at least as important as getting the volunteering job done. The result: unforgettable encounters while contributing to a more beautiful, green & social city.

The Present method

We take both your employees' interests and company's impact goals as starting point to match you with help requests we receive from our social partner organizations. This way we ensure that your employees' helping hands are present at the right place at the right time!

Our project types

- **social volunteering** (e.g. going to the zoo with the elderly, cooking for a homeless shelter, ...)
- **practical volunteering** (e.g. renovating a playground at a family shelter, painting walls in a home for disabled Amsterdammers, ...)
- **social gardening** (helping with gardening activities at people's homes)
- **skill-based volunteering** (e.g. CV training for refugees, ...)
- **special donation actions** (e.g. 'back to school' donation action, ...)

Our services

- matching your employees with volunteering projects or team-building events that are in line with their interests
- facilitating impact days including different types of projects where human interaction between volunteers and vulnerable Amsterdammers are key
- partnership programs
- organizing corporate volunteering activities all over the Netherlands as Stichting Present is operating in 75 Dutch cities

We believe that there are thousands of different ways to spread kindness and give back to our communities: baking pancakes for the homeless, cleaning Sloterpas by canoe, turning a poor family's new house into a home, ... By organizing customized corporate volunteering activities we not only turn your employees into happier people but also Amsterdam into a better place to live for everyone.

The Serve the City method

Based on your employees' interests and company's specific CSR goals, we design, plan and run tailor-made corporate volunteering events. The goal: bringing your employees closer together while caring for people and/or environment in our city.

Our project types

- **social volunteering** (e.g. beauty day for the elderly, preparing lunch packages for school children, ...)
- **hands-on volunteering** (e.g. gardening activities at an elderly home, renovating an emergency shelter, ...)
- **green volunteering** (e.g. helping out at a city farm, cultural park clean-up tour, ...)
- **skill-based volunteering** (e.g. developing fund-raising campaign for a shelter, ...)
- **special donation actions** (e.g. donating old laptops to a refugee shelter, reversed advent calendar action, ...)

Our services

- designing, planning and running customized volunteering projects & team-building
- organize company-wide impact days including volunteering projects with different focusses e.g. social, practical or environmental volunteering
- partnership programs
- arranging corporate volunteering activities worldwide as we are part of the global Serve the City volunteering movement
